# Smart Kids Space: For Kids Who Really Love Space!

## Synopsis

Open your eyes to a world of discovery with this amazing fact-packed book. From the Solar System to the Milky Way, from Mars to Mercury, from UFOs to the Space Shuttle, Space is an ideal first guide to the mysteries and wonders of our incredible universe. Written in an accessible and fun style, the informative text is perfectly complemented by visually stunning, large-sized, full-color photography. Perfect book to introduce children aged three and over to the fascinating world above us.

## Book Information

Age Range: 4 - 7 years

Grade Level: Preschool - 2

## Customer Reviews

Roger Priddy's love for children's early learning has led him to create some of publishing's most successful children's non-fiction books, including Priddy Books' million-copy bestsellers, *My Big Animal Book* and *Happy Baby Words*. Roger says: "It is always rewarding to see a child enjoying and learning something from one of our books, especially babies, when you think it could be the first book they have ever seen. "I am very lucky to have a career where you get to think up fun ways to teach a kid how to write their letters and learn their first words, whilst finding out about Dinosaurs at the same time!" Roger lives with his wife, Zena, in London and Cork, Ireland. They have four children, who have given him most of his best ideas for his books.

This book says it's good for 5+, but my son, who started to show an interest in space when he was 2-almost-3, LOVES it. He's almost 4 now and still enjoys reading it almost every day. There is one very annoying typo (humans is misspelled on one page) but other than that it is a good and informative book. When I read it to my son I don't read everything on every page. So the next time, I can read the things I didn't read the last time. It has a lot of information, but has helped my son memorize the order of the planets, and learn facts about each planet. It also talks about nebulae, craters, space tourism, and of course space shuttles and rockets. In the back of the book is a timeline of space related events and the final pages include definitions of things mentioned in the book. I highly recommend this book. It's fun for both of us to read. It has nice, bright photos and is large - but not too big. All in all a wonderful book for any kid!

perfect for a 6yr old into space . detailed . it helps when or customers post the insides of the children's books ,than guessing ages.

My daughter is currently enamored with all things planetary and space travel! It's such a fun topic to explore as a family, and this book has so many neat facts about the planets, astronauts, satellites, etc. This book is WONDERFUL!

Purchased for 5 year old grandson who is a good reader. He opened it and began reading it to his 3 year old brother. Colorful and interesting for child interested in space.

Great for kids and adults. Lots of information. Recommended

ok product for kids

My 3 1/2 year old loves this book and wants to read it every night! Each page tells facts about the sun and each planet. It also describes things associated with space such as space shuttle, astronauts, stars, etc. He has learned so much from this book! I would definitely recommend if your little one loves space!

LOVE these books. Wonderfully illustrated and the fun facts help kids learn and read. My 6 year old grandson reads and brings these books home from his school library all the time..he will LOVE having this as a gift. I bought more than one.
