A Practical Guide To Solving Preschool Behavior Problems, 5E

Synopsis

Practical Guide to Solving Preschool Behavior Problems is unique in that it focuses on very specific situations preschool teachers, caregivers and administrators face when dealing with common behavior problems. This book covers 42 behaviors, organized into seven categories: aggressive and antisocial, disruptive, destructive, emotional and dependent, eating, non-participatory and multiple behavior problems. The author addresses a plethora of behavior-related topics to make this book the sole resource one will need to successfully address behavioral issues. They include relevant theories, setting a positive environment to encourage appropriate behavior, why children misbehave, working with children with special needs, techniques for dealing with inappropriate behaviors, working with parents and record keeping. The book provides thoughtful, step-by-step instructions, including observation, consideration and recommended procedures for halting the undesirable behavior. Even beginning teachers will be effective in dealing with challenging behaviors when they employ the techniques espoused in this text. A list of references including books, articles and Web sites offers further learning opportunities for the interested reader.

Eva L. Essa is a professor in the Department of Human Development and Family Studies at the University of Nevada, Reno, where she has been on the faculty since 1971. The author of several books, Ms. Essa has been engaged in writing and research, published in various professional journals, and has been involved with the National Child Development Associate Program since its

inception. --This text refers to an out of print or unavailable edition of this title.

Best book I ever read on the subject!My copy was damaged by water, so I order another copy!

Best prek (and primary grades) behavior book ever. I'm a special education teacher and I use the techniques in the book successfully with ALL my students.

I work with preschoolers who exhibit a variety of handicaps: autism, behavioral disorders, delayed language , etc. This book is a great resource to use when dealing with parents and outside agencies and preschools.

This book is a GREAT guide for dealing with people of ALL ages in many settings including the business office. It was an essential tool during my career as a family and consumer science agent. Now, it is useful in dealing with members of my personal family. Of course, when using the techniques outlined in the book with older individuals particularly adults, one transfers the objects and settings to the appropriate age level/specifics.
