Leukemia (The Biology Of Cancer)

Synopsis

Leukemia, or cancer of the blood or bone marrow, occurs in both acute and chronic forms. While the exact causes of the disease are not known, several risk factors have been identified. There are four major types of leukemia: acute myeloid leukemia (AML), chronic myeloid leukemia (CML), acute lymphoid leukemia (ALL), and chronic lymphoid leukemia (CLL), and treatments include chemotherapy, radiation, and bone marrow transplants. Leukemia discusses the science of leukemia, theories about its causes, the history of the disease, and the current treatments and how they work.

Book Information

Series: Biology of Cancer

Library Binding: 168 pages

Publisher: Chelsea House Pub (Library); 1 edition (April 1, 2009)

Language: English

ISBN-10: 0791088227

Customer Reviews

Author and consulting editor Donna M. Bozzone, Ph.D., is a professor of biology at Saint Michael's College. She earned her B.S. in biology from Manhattan College and her M.A. and Ph.D., both in biology, from Princeton University. An author of more than 25 publications, Dr. Bozzone is also a member of the Publication Review Panel for the Journal of College Science Teaching and an ad hoc reviewer for American Biology Teacher, as well as the consulting editor for Chelsea House's The Biology of Cancer series. She lives in Vermont.

Yes, the book was what I looking for an overview of the blood cancer leukemia.

Good images, simple vocabulary. Text with general information, but may be helpful to people that unknow subject. It is easy to understand... Advisable :)
