Age Range: 9 and up

Grade Level: 4 and up

Customer Reviews

My son will be entering fourth grade so we agreed this workbook would be something he would work on during the summer. He works on this workbook every day - completing me four pages at a time. I never hear a complaint - the stories are interesting. I am also interested in them as I am making sure his work is correct. The questions related to the readings require the student to actually read the story and not just match up a sentence and write it down. The exercises vary a bit as well to keep their interest. I have not had my son take any Kumon tutoring, but understand the workbook is similar to the tutoring - but without the cost. I am confident my son will have a great start to the next year in part because of this workbook.

I started using the Kumon series to help supplement my children's learning, especially during summer vacation. My 2nd grader just recently finished this Grade 4 Reading book. She really enjoyed the stories and excerpts from books and was talking about reading some of those books

now. Overall, she most enjoyed working on this book first before her other Kumon subjects, since she enjoys reading. She is in a higher reading group at school. She did struggle with some of the vocabulary crossword puzzles, but I would rather she have some challenge than it being too easy!

This workbook is a very high quality product. It contains reading selections and then questions for the children to answer in order to reinforce their mastery of comprehension skills. I am using this as a homeschool supplement. We normally have reading lists of books for the kids for the year, but I like to include these books to reinforce those comprehension skills as well. I would highly recommend it. The only reason I gave it 4 instead of 5 stars is that my children are not too pleased to complete it - it doesn't look like the most fun when you open it up to a worksheet. Again, that is a matter of enjoyment for my children, not the quality of the content which I feel is fabulous.

A little easy the first half of the book, but very fun and interesting book.

Excellent resources for students.

We use this for our 6 year old and 10 year olds and not only does this really help them learn but they also enjoy doing it. Before these books my kids struggled and now are keeping up with their classmates

good workbooks, kids love it.

great book
