Steven Hampton became interested in locks and electronics at an early age. At 14 he acquired a set of U.S. Air Force electronic training manuals and began building various transistor circuits by scalping radios and junkyard TVs. At 17 he was making his own lockpicks and was considered a master lockpicker, and by the time he was 18 he'd invented the magnetic padlock, which is still on the market today. After a stint in the navy, he studied digital electronics and worked in many technical fields. He also became interested in the martial arts, studying Tibetan White Crane kung fu, jujitsu and wing chun.

THE BOOK WAS VERY SMALL,WITH VERY LITTLE INFORMATION ABOUT LOCK PICKING

This book is supposed to be about "lock picking" Ha HaThis book has nothing and I wouldn't take it if it was free!This book is not worth the money if you want a good book about lock picking, keep

looking because this is not the book. In my opinion he is "money Bags" trying to make more money on another book...filling his pockets with money and giving you nothing in return. Steven Hampton did write a good book "Modern High Security Locks- how to open them. You can make your own opinion on this book but I have read a lot of books on the subject not including the movies I have watched. I recommend getting the movie "Lock Picking For The New Millennium" By David Storm -- He does a really nice job of showing the art of lock picking.

the advance secrets for finger sensitivity is "YOGA" what a joke. he refers to a few locks, like the american lock stainless being a tough lock! oh my god any amateur knows its a three second lock to open and two of them seconds is getting your tools out! please save your money if you are looking for a book you already know more than what is in this print. the new updated special personal tools that it describes, hmmm. don't waste the grinding wheel on these ideas.

forget buying or borrowing this book. less than 45 pages i could copy info off the web and give you a better deal..

The book covers nothing of lock picking, just the history of it. If I could go back in time I wouldnt have even borrowed the book from the library!

i would like to review the entire text. i found it to be much useful
