Moduli Spaces Of Stable Sheaves On Schemes: Restriction Theorems, Boundedness And The GIT Construction (Mathematical Society Of Japan Memoirs)

Synopsis

The notion of stability for algebraic vector bundles on curves was originally introduced by Mumford, and moduli spaces of semi-stable vector bundles were studied intensively by Indian mathematicians. The notion of stability for algebraic sheaves was generalized to higher dimensional varieties. The study of moduli spaces of algebraic sheaves not only on curves but also on higher dimensional algebraic varieties has attracted much interest for decades and its importance has been increasing not only in algebraic geometry but also in related fields as differential geometry, mathematical physics. Masaki Maruyama is one of the pioneers in the theory of algebraic vector bundles on higher dimensional algebraic varieties. This book is a posthumous publication of his manuscript. It starts with basic concepts such as stability of sheaves, Harder-Narasimhan filtration and generalities on boundedness of sheaves. It then presents fundamental theorems on semi-stable sheaves: restriction theorems of semi-stable sheaves, boundedness of semi-stable sheaves, tensor products of semi-stable sheaves. Finally, after constructing quote-schemes, it explains the construction of the moduli space of semi-stable sheaves. The theorems are stated in a general setting and the proofs are rigorous.

Book Information

Series: Mathematical Society of Japan Memoirs (Book 33)

Paperback: 154 pages

Publisher: Mathematical Society of Japan (September 18, 2016)

Language: English

ISBN-10: 4864970343

ISBN-13: 978-4864970341

Product Dimensions: 6.8 x 0.4 x 9.7 inches

Shipping Weight: 11.2 ounces (View shipping rates and policies)
