# LooseLeaf For Abnormal Psychology

## Synopsis

The seventh edition of Susan Nolen-Hoeksema's *Abnormal Psychology* continues her mission to create a program that blends the most contemporary research on psychological disorders with compassion for those who live with these disorders. *Abnormal Psychology* personalizes the human experience, while helping students think critically and apply their knowledge through activities in McGraw-Hill Education's digital learning platform, Connect. Connect for *Abnormal Psychology* includes the only adaptive reading experience on the market, McGraw-Hill Education SmartBook, as well as new Interactive Case Studies and the Faces of *Abnormal Psychology* video program.

Average Customer Review: 1.0 out of 5 stars 1 customer review

Best Sellers Rank: #28,448 in Books (See Top 100 in Books) #66 in Books > Textbooks > Social Sciences > Psychology > Clinical Psychology #95 in Books > Medical Books > Psychology > Clinical Psychology

## Customer Reviews

Brett Marroquin is an assistant professor of psychology at Loyola Marymount University in Los Angeles, California. He received his Ph.D. in clinical psychology from Yale University under the mentorship of Susan Nolen-Hoeksema, and completed a National Institute of Mental Health (NIMH) postdoctoral fellowship in biobehavioral issues in physical and mental health at the University of California, Los Angeles. His research examines interpersonal influences on emotion, emotion regulation, and cognitive processing in healthy functioning and mood disorders. His current work focuses on the roles of social contexts and romantic relationships in emotional adjustment to negative events, including cancer diagnosis and treatment, and how effective or ineffective support from partners affects couples' physical and mental health. Susan Nolen-Hoeksema (1959–2013) In January 2013 we lost our esteemed author and friend, Susan Nolen-Hoeksema.

Susan was a renowned scholar, teacher, mentor, and academic leader. She was recognized internationally for her work on how people regulate their feelings and emotions and how particular patterns of thinking can make people vulnerable to and recover slowly from emotional problems, especially depression. Her research shaped the field's perspective on depression in women and girls, and countless empirical studies and theoretical contributions followed as she developed her groundbreaking theory of rumination and depression. In her words: "My career has focused on two parallel goals. The first is to use empirical methods to address important social and mental health problems (depression, rumination, women's mental health). The second goal is to disseminate psychological science. I also believe in taking science to the public, through my textbook on Abnormal Psychology and books for the general public on women's mental health."

Susan taught at Stanford University, the University of Michigan, and Yale University. Susan's work focused on depression, mood-regulation, and gender, for which she was recognized and received the David Shakow Early Career Award from Division 12, the Distinguished Leadership Award from the Committee on Women of American Psychological Association, the James McKeen Cattell Fellow Award from the Association for Psychological Science, a Research Career Award, and multiple grants from the National Institute of Mental Health. In addition, she was the founding editor of the Annual Review of Clinical Psychology, now the most highly cited journal in the field of clinical psychology. In addition to being an accomplished professor, scholar, teacher, and writer, Susan was a loving and devoted mother, wife, daughter, sister, friend, and mentor. Susan touched and inspired the lives of many people both professionally and personally, and she will be dearly missed.

Misleading in the extreme, daughter rented ebook. description states "New to this edition is Connect for Abnormal Psychology McGraw-Hill Education's digital learning platform which includes the groundbreaking adaptive reading experience SmartBook as well as Faces: Interactive and the new Interactive Case Studies for Abnormal Psychology." except it does not include Connect which apparently is another \$90 for six months. mcgraw hill charges \$90 for six months and includes the textbook and connect. just spent an hour chatting with mcgraw hill trying to get this resolved. now i will see if it resolves it.
