Get Ready For School: Pre-K

Synopsis

With nearly 290,000 copies in print, Get Ready for Pre-K has been teaching and reinforcing basic early-learning skills through rewarding activities for more than 10 years. The updated edition, with 30% new material, features the same adorable art and easy-to-follow instructions, but contains approximately 100 new standards-based activities recognized by educators nationwide. Early-learning skills emphasized here include writing the uppercase alphabet, counting from 1 to 10, recognizing shapes and colors, and identifying the four seasons and the days of the week.

Customer Reviews

Heather Stella is a teacher and holds a masters degree in elementary/special education. She has written more than a dozen titles in the Get Ready for School series, including Get Ready for Pre-Kindergarten: Numbers, Shapes & Colors and Get Ready for School Pre-Kindergarten Laptop Workbook. She lives in Warwick, NY.

You will love this book. I am a homeschooling mom and wanted something for my 3 year old. The pages are fun and educational. My favorite thing is it has a hard cover and is spiral bound. This is nice because the book doesn't shut if your not holding the pages down like the other books would.

Very affordable price too! For sure a 5 star.

Love. Love. Love this. My 4 year old also enjoys it. Though it teaches how to write the letters, there are also matching games and puzzles which stimulate the brain but also is a lot of fun and diverse. One thing I did was I ripped out the pages and took them to be laminated, making them dry erase! I punched holes in the edges and keep them in a 3-ring binder. Now, it's not just a one-time investment, my daughter can go over them again and again with dry erase markers. She loves them and asks to do them as an activity. I highly recommend this book. I think the quality of the instruction is great and varied and covers so many subjects. I have been looking for something like this for a long time and am so happy to have found it.

All of the 4 star + reviews are dead on! This book is wonderful and I'm happy to have added it to my resources for teaching my two year old. I truly believe it could be used alone for learning the basics in preparation for pre-school, but when paired with hands-on activities, learning themes, and other media it's a wonderful addition. I'm using it with my two year old. She's pretty far along on the learning curve, but still needs my assistance. She's enthusiastic about the activities in the book. I keep it out of reach only for when I'm working with her otherwise she'd be grabbing it. The illustrations and text are inviting and easy on the eye. The print is large. The context covers so much. I'm glad I came upon it. Would recommend to any parent who is working with their child on fundamentals to learn before entering pre-k or K. My only far-fetched wish is a laminated version - although I could tear pages out and laminate myself....

Incredible workbook. I recently received ours in the mail and was immediately surprised by its solid construction. It has a binder type cover, spiral bound, and with perforated pages. I recommend purchasing dry erase protective sleeves so you can do the sheets over and over again or use with multiple children. Note: my book was missing a few letters of the alphabet in the letter portion, and some letters were duplicated. Because I have a dry erase letter book, I wasn't worried about missing those pages. But I urge you to insure your book isn't missing them before you get started.

Please, Please, Please, listen to me when I say I have bought MANY preschool books for my 4 year old to work in. This is so far the best one!!!!!! The second best one I bought was Mead Preschool workbook. However, this book has LOTS of opportunities to practice writing and tracing letters and numbers and it integrates colors into the various lessons. It also reviews seasons, directions,

etc...THIS CURRICULUM HAS EVERY LESSON YOUR CHILD NEEDS TO BECOME PREPARED FOR AND MASTER PRESCHOOL! I buy many curriculum books so my daughter is always reviewing so I allowed her to write in this book, however if you want to give your child continued repetition and not have to buy anymore curriculum books I suggest making copies OR BUY TWO!!!!!!!!!!!!!! I AM GOING TO PURCHASE GET READY OF KINDERGARTEN next!!!!!!!!!!!!!!

I originally hand made an educational pre k book for my daughter to do some basic learning at home, then I was at a friend's house and saw this and immediately ordered it. It really trumps anything I could have ever made while being very well priced! My 3 year old daughter loves it too and she's already learning to write letters and her ABCs and all sorts of things. I only wish that they repeated pages throughout the book... for example.. there is only one page to learn to trace "A" and then that's it. Repetition is needed to learn to write letters and so a couple pages tracing the letter A would be beneficial.

My daughter just turned four and will be starting her second year of preschool so I figured this would be good for her over the summer. Although my daughter is not "academically" where my other daughters were at her age, she is in preschool and at this point there really is no exception on what she "should know" at four. The book says Pre-K, and some of the book definitely is, but some sections seem to skip over basic things like individual letter and number identification, so evidently we are going to have to find something in addition to work on those areas. Otherwise, I like the fact you can skip around in the book, and it is definitely something we will be able to use for a long time. I also like the fact that it is very colorful and engaging.

My son loved this book, and wanted to do the whole thing in one sitting. Some of it seemed to be more geared to a younger crowd, but overall it was good. I would definitely buy other workbooks in this series. Taking one star off because of the colors. One a few pages it would ask, circle the blue items...but everything would be in purple. While I know this was probably just an error in printing, it can be confusing when your child knows purple is in fact not blue.
