12 Australian Insects! Kids Book About Insects: Fun Animal Facts Picture Book For Kids With Native Wildlife Photos (Kid's Aussie Flora And Fauna Series 4)

Synopsis

"12 Australian Insects! Kids Book About Insects: Fun Animal Facts Picture Book for Kids with Native Wildlife Photos" is a fun book for kids and is the fourth in the "Kid's Aussie Flora and Fauna Series" for Children's author Leanne Annett presents this fun and educational book with gorgeous color photographs of unique Australian insects and arachnids with interesting facts in written text on 12 beautiful and diverse Aussie animals. If your child likes animals and nature then they are sure to be stimulated and enjoy learning all about these creatures from the eight-eyed jumping spider to the colorful Cairns birdwing butterfly and the aggressive bull ants. This Kindle book is exclusive to the store. It can be easily downloaded and your child can begin reading and learning within a short time. Note: This Aussie Flora and Fauna Series book has been designed for children aged approximately 7 years and older, who can read the book for themselves. Alternatively, parents can read the book to their kids (of all ages) and enjoy a fulfilling time of child and parent bonding. It was a great pleasure to write this book (and the others on different animals). I hope that you and your children enjoy reading it as much as I enjoyed writing it. Some of the Australian insects covered in this book include: Australian Huntsman Spider, Jumping Spider, Australian Golden Orb Spider, Green Carab Beetle (also called Green Saffron Beetle), Giant Burrowing Cockroach (Australian species), Australian Scorpion, Australian Stick Insect, Australian Dragonfly, Australian Bull Ant (also called Inch ant), Australian Cicada, Australian Termites, Cairns Birdwing butterfly. Why not take advantage of the limited time low price as this Kindle book launches and grab a copy for your child today. I am sure your child will enjoy the colorful pictures and the interesting information on Aussie insects. Please let me know your thoughts on the book by leaving a review after you read it. Thanks so much and enjoy reading and expanding your knowledge of Australian flora and fauna.

Customer Reviews

WOW!! What a lot of new things to me about these 12 Australian insects. I feel I learned a lot! Such wonderful illustrations and or photos too. So, I therefore recommend this for five star rating and for kids of any age who would like to learn these items as well as any others who may be planning on either visiting Australia or moving there would help them to have an idea of what to expect. I received this ebook. for free and in return, here is my honest review. Super work Leanne! By Angela

granddaughter read it fast. she seemed to like it.

I know this book is written for children, but I haven't had time to show it to my grandson yet. I started reading it and couldn't put it down until I finished it. This is a fantastic look at 12 different types of insects that live in Australia and part of the time, I was thinking I'm sure glad I don't live near these and at other times, I thought, these are so cool, I want to travel to Australia and see them for myself. This is a wonderful look at a world that we in America never see. Well done.

My daughter is studying about insects in school and she wanted to talk to her class about something other than just caterpillars or lady bugs so we decided to go with this book. It is a great book. The pictures look like they are going to jump out of your e-reader (Yikes!) and we learned a lot about different types of insects. My daughter was fascinated with the jumping spider, the dragonfly and the stick insect. I will look for more books from this author.

I got this book for my little cousin who loves insects and thought it best to read it before I gave it to him. I think I learned more than he did! I'm not a fan of insects and some of the creepy crawlies in the book made me glad I lived far away from Australia but that aside, the book is really informative and well written. Looks like I'm going to have to check out the other titles by this author. Very impressed.

I have read most of the authors books as I find all of them packed with interesting facts and GREAT pictures. This one once again has some extremely interesting facts. I certainly did not know that there were over 200 species of Cicada's alone in Australia. I look forward to your next book especially Great Barrier Reef.

This well written and beautifully illustrated book presents fascinating information for adults as well as kids. I know some people keep pet tarantulas but I never knew other insects would serve as pets. In fact, I never knew any of the interesting details skillfully and simply shared in this work. Good stuff!

Leanne Annett has brilliantly mixed such interesting and fascinating insects with realistic and awesome pictures that will delight youngster in this special kindle edition. My kids are online now searching the Australian Insect Farm site for pets... A must read for kids to grow their understanding and intelligence!
