Michael Laposata, MD, PhD (Nashville, TN) Edward and Nancy Fody Professor and Executive Vice Chair of Pathology, Pathologist-in-Chief, Vanderbilt University Hospital; Professor of Medicine, Vanderbilt University School of Medicine.

This one was pretty good. It has a lot of information for things that supplemented my fairly crappy Rodak's hematology in the program. Some oversights included the AML not having every phase m0-m7 it had 6 of them. I think if you want cytogenetics on a broad scale it was great as it brought me ahead of the class before the chapters with it. Yeah guys rate me up, who gives you actionable details like that? Also, many topics include several pages of details it's not a laconic paragraph about something that is just generic pastiche it's a fairly in-depth (but not like Henry's which is like post-pathologist level half the time) resource that can help when combined with course materials if your teachers suck and don't even know anything about what they are teaching.

Very good indeed and I think this is a wonderful book.

I found the layout and the material were presented in an easy to follow and understand format.

For setting up laboratory protocols for a laboratory in Tanzania it is an excellent resource.

Concise, clear and thorough. Excellent seller

its ok and clean

Excellent.

excellent
