Love the title and would love a book that pays it off. But this isn't at all a guide to office or studio decor and gives almost no advice about decorating. It is a collection of blurbs about designers, writers, and artists who have studios - little stories about their businesses, their challenges in organizing themselves, and their thoughts and feelings about their spaces. The intro has a little about feng shui, taken from another author.

I've been a longtime follower of Desha on Instagram, so I jumped at the chance to pick up her new book! It does not disappoint! So many great ideas for utilizing the space you have and making it your own. Some of the studios are quite large but I love how Desha included a maker who literally turned her closet into her workspace! What an extra treat to get to peek into some of my favorite Instagrammers studios too. This book arrived at the perfect time as we are currently renovating the lower level of our home which is being converted into my art and metalsmith studio, and will be shared with my young children. It's going to be a joy to create and run my business while having my kiddos close by. There are tips for creating kid's spaces which will come in handy when adding the finishing touches to their area as well. What a spectacular book release!!!

I will have known Desha for a year, come December, and she is someone that juggles many balls and does it with such grace...this beautiful book was one of her bigger balls and it is amazing! I am so thrilled to have a copy. Desha has captured some very unique and creative spaces of amazing women telling their stories and what the perfect place means to them. The photography is beautiful. There are work spaces of well known people like Emily Henderson, Holly Becker and Justina Blakeney as well as many other amazing women. Desha definitely has a knack for writing and telling it like it is. I also love that she mentions the importance of finding a creative space for your children. If you enjoy decor books then this is a must...you won't be disappointed.

If you love creative interiors and are looking for inspiration to apply creative ideas to your own home, this book is a must-have addition to your interiors books collection. Desha gathers beautiful ideas for your creative work space to transform your home office into your own 'sweet spot' to let creativity flow. You won't want to miss featured examples by the author herself and well-known bloggers such as Holly Becker from Decor8 and Emily Henderson amongst many great others. I love my signed copy and am sure to order more for Christmas presents.

This is one of those books that you have to ration. Every page contains sage advice, lovely photos and inspiration for your own creative work space. As a designer who works from home, I've gotten a lot out of hearing the refreshingly honest stories of each artist featured - and found more than a few ideas to implement into my own space. This is a great book that applies to any stage of a creative endeavor.

I absolutely LOVE this book! I ordered my copy directly from the author and was pleasantly surprised to learn that it's got so much more to it than just design. It's a curl up with a cuppa kinda book. Lots of inspiration via images of unique (but not out of reach) work spaces. Then add to that layers of commentary by each woman as she talks about what she does and how she uses her space. Plenty of little surprises and twists and turns in the way the book is laid out. If you're a creative or artist of some kind I think you'll especially love it!

OMG I am in love with this book! I must say that I am not disappointed. I have been a follower of Desha for almost a year and I just love her style. This book is a must read. The tips that she has in this book are AMAZING!!! She pays attention to every detail and makes sure that you fall in love with your creative space. I am so glad to have this book as my go to for my design needs. Thx Desha for writing this amazing book! ã ã ã'Â
