One Hundred Shoes: A Math Reader (Step-Into-Reading, Step 2)

Synopsis

Centipede has one hundred feet. One hundred feet means one hundred shoes. How in the world does Centipede choose shoes? This Math Reader clearly demonstrates the concepts of pairs and multiple sets, all in simple, rollicking, rhythmic text and with bright, graphic illustrations.

Customer Reviews

Centipede has one hundred feet. One hundred feet means one hundred shoes. How in the world does Centipede choose shoes? This Math Reader clearly demonstrates the concepts of pairs and multiple sets, all in simple, rollicking, rhythmic text and with bright, graphic illustrations.

First of all, those in the know will have to get past the fact that despite the meaning of its name, a centipede tends NOT to have 100 feet. Those who can are certain to enjoy this simple story about shoes, feet and multiples of 100. Fortunately, the story is short, fast-paced and has logical rhymes. Unfortunately, the "math" part is really only about three sentences long and includes only: two times fifty, five times twenty and ten times ten. Even so, with arithmetic seeming to sometimes take a back seat to reading and writing, this is an easy, fun way to expose your younger reader to the number 100 and some of its factors. Reading level is K through Second grade. This would be a great book

to read during 100th Day of School celebrations. Also good: Mary Clare Loves to Share.

A six-year old review: I really like this book because I really like the picture of where he keeps his shoes when he sleeps. And how could anyone have a hundred feet anyway?

Bought two of these for my sons 100th day of school. One for our son, one for his teacher. A very cute story that was quickly put in the favorite pile in our house.

cute book. Read it a few times for my kids.

One Hundred Shoes (Step-Into-Reading, Step 2) One Hundred Shoes (a.k.a. the centipede book, in our home) is GREAT. I bought it as a "math" reader for my kids, ages 5, 6 and 9. They all enjoy it but my 5yr. old son esp. LOVES it. We began reading it just before K5 began and he memorized it w/in two days. Although it's currently beyond his reading level, it has served as a great incentive; he is learning/beginning to actually read the book he loves so much. It does Not touch on "math" aspects as much as expected however my kids love the rhyming and the fantasy of a centipede wearing shoes and wearing different types for different occasions has offered scope to broaden their imagination! They immediately looked up centipedes on the internet to "see" what a real centipede looks like, etc. We read it often as it maintains its appeal :-)

Five Silly Fishermen (Step-Into-Reading, Step 2)

A Dollar For Penny (Step-Into-Reading, Step 2)

My grandson read this book tonight and he was confused at first as to why he needed shoes but he did enjoy the little story. I like these simple reading books for the kids to start out reading with. There isn't a lot on a page to frustrate and overwhelm them.

Bought the kindle version for my granddaughters new kid-kindle. The illustrations are so fun, bright and cheerful. It is fun for her to read and count the different styles of shoes on every page. Highly recommend as a fun book for boys or girls.

Fun read! My 3 year old daughter really enjoys and "reads" it to me!
