Time For Kids: Henry Ford (Time For Kids Biographies)

Synopsis

As a young boy, Henry Ford was fascinated by technology and how objects worked. His childhood interests led him to leave the Ford family farm in Michigan in search of a career with machinery, and the rest is automotive and economic history. TIME For Kids® Biographies help make a connection between the lives of past heroes and the events of today. Henry Ford made cars affordable, turning them into the primary means of travel for Americans. His innovations, including the assembly line, are still benefiting us today.

TFK editors also publish the TIME For Kids® Science Scoops series, giving kids the inside scoop on the world's most fascinating topics.

My seven year old read this for our homeschooling curriculum this year in order to add some nonfiction into his reading time. He thoroughly enjoyed this book and learning about Henry Ford. My son wants to be a mechanical engineer when he grows up so this book was a big hit for him. He loved all of the pictures and the book was well laid out for his interest level. He read other biographies on Christopher Columbus and Walt Disney from other publishers but he liked this version of biography much better due to the color pictures and layout of the book. It was easy for him to read but still informative and on grade level for him. I would definitely recommend this little book. Happy reading!!

I bought a bunch of these books for my 8 year old son and ended up reading through them all myself. Very interesting information written in an engaging style. My kids have enjoyed them and I would highly recommend these books.

Since I've started to incorporate biographies into my 3rd grand daughter's book list, I felt this would be an east ready for her and she LOVES Time for Kids books. She found it very interesting and actually retained many facts from the book. I highly recommend this book.

very interesting for the kids

Good Resource

Great book. Fair reporting. Thanks

3rd grader needed books on Ford for reports. He felt it was a fun read and asked him questions afterwards and he learned the "highlights".

My 10 year old granddaughter read this book on our way to visit the Henry Ford Museum and Greenfield Village. During our visit she turned to me several times and smiled at interesting facts that she already knew and understood!
