A Practical Guide To Library Of Congress Classification

Synopsis

A Practical Guide to Library of Congress Classification is a hands-on introduction to LC Classification. It examines each part of the LCC call number, how it's assembled, and guides the reader through each step of finding and constructing LCC class numbers in Classification Web. Exercises give readers immediate practice with what they just learned.

Customer Reviews

A simple and clear guide to our beloved LCC--straightforward and easy to understand number-building strategies for both professional librarians and novice LCC-users. Snow provides practical lessons on navigating and using Classification Web, as well as common-sense tips for tweaking cutter numbers to fit a library's unique collection. The end of chapter exercises are especially useful because of the detailed explanations given for many of the answers. (Shawne D. Miksa, Associate Professor, Department of Library and Information Sciences, University of North Texas) A clear, straightforward introduction to the Library of Congress Classification is essential for students and practitioners who want to learn the intricacies of assigning Library of Congress Classification numbers. (Gretchen Hoffman, Associate Professor, School of Library and Information Studies, Texas Women's University)

Karen Snow is an Associate Professor in the School of Information Studies at Dominican University

in River Forest, IL. She teaches face-to-face and online in the areas of cataloging, classification, and metadata. She completed her Ph.D. in Information Science at the University of North Texas in 2011 and while doing so worked as a cataloger in the Rare Book Room, University Archives, and the Technical Services departments.
