Renal Nursing

Synopsis

Renal Nursing is a comprehensive evidence-based guide to nursing in the field of nephrology and kidney care. This fully updated fourth edition discusses the stages of chronic kidney disease, prevention and early management, pre-dialysis care, haemodialysis and peritoneal dialysis, transplantation, investigations and nutrition. It also includes key information on renal care in infancy, childhood and early adolescence. The underlying anatomy, physiology and psychology of kidney disease are reviewed in depth, along with the skills and knowledge required to provide support, treatment and high-quality care. Special features: Fully grounded in the NHS National Service Framework for renal services New chapter on patient involvement in renal care Content and references fully updated to reflect changes in policies, evidence, care and management Begins with the basics and covers all the vital material required by anyone working in renal care Renal Nursing is an ideal reference text for nurses undertaking post-registration renal courses, student nurses undertaking a placement in a renal ward, specialist renal dietitians, pharmacists and other professions allied to medicine.

Customer Reviews

Ã¢â€”Å“This edition has been updated with the most current references and resources and includes a new chapter, written by patients and partners of those with kidney disease, that addresses patient and caregiver involvement in renal care. When used in addition to hands-on experience, this book should give nursing or allied healthcare professionals the confidence that they

have the most current and complete knowledge base necessary to fulfill their crucial roles in this specialty. (Doody's, 13 February 2015) "This book is for all nursing staff including student nurses caring for the renal patient. This would be valuable for allied health professionals such as specialist pharmacists and renal dietitians. It would also be apt for a junior doctor requiring further information." (Nursing Times, 16 October 2014) "The 3rd edition of Renal Nursing provides a very good introduction to nephrology nursing for the beginner to intermediate practitioner. Get it if you are new to our specialty or if you are undertaking post graduate renal studies and are looking for a general renal nursing text." Renal Society of Australasia Journal, Oct 08

Renal Nursing is a comprehensive evidence-based guide to nursing in the field of nephrology and kidney care. This is a course text. Well written, easy to read.

Very good read.
