Multiple Sclerosis, Mad Cow Disease And Acinetobacter

Synopsis

This book explores and advances the concept that two neurological diseases, "mad cow disease" and multiple sclerosis, may be linked through exposure to the common microbe *Acinetobacter*, which is found in human sinuses, on skin and in the soil.

Book Information

Customer Reviews

Through the discovery of the link between *Acinetobacter* bacteria in Multiple Sclerosis patients and Bovine Spongiform Encephalopathy affected animals, the author brings together a comprehensive look at the cause of MS throughout the world. Multiple Sclerosis, Mad Cow Disease and *Acinetobacter* delves into the cause of these two neurological diseases, MS and BSE, and elaborates on their relation through exposure to a common microbe: *Acinetobacter*, found in human sinuses, on the skin and in the soil. Multiple Sclerosis, Mad Cow Disease and *Acinetobacter* informs the reader that multiple sclerosis may be linked to the microbe *Acinetobacter*, which carries molecular structures resembling myelin, the outer sheath covering of neurones. This book will be of interest to international scientific and medical communities, as well as accessible to patients, neurologists, research institutes and the general public.

Professor Alan Ebringer, Department of Rheumatology, The Middlesex Hospital UCH School of Medicine and Infection & Immunity Group, Division of Life Sciences, Kings College, London, UK.
