We love these books for our 2.5YO. They are a great introduction to some of the science behind topics which even children of a young age will find fascinating. We are going through an all things science phase and my LO was so excited to get this book. Terms are broken down but not over simplified so your children learn new words and their meaning - and for the trickier pronunciation items have a break down for the reader of the book - which is always useful. I know that in the other mammals book there were complaints that there was no mention of mammals having mammary glands to feed their young - this is covered in this book in a really nice way - perhaps this part can be incorporated in that book. This is not a fully comprehensive list of all mammals from prehistoric times, but there is a good level of coverage, and unless you are an expert already, I am sure that even the grown ups will learn something.

Great detailed and highly educational illustrations and text. My son adores this series and I feel like he learns a great deal from these books...heck, let me be honest, I learn a lot from these books too. :)

I love Cat in the Hat Learning Library books. This one is all about prehistoric animals. What else is a great way to see pictures and learn about prehistoric animals than from Cat in the Hat. Your child will love this book, I do.

A+++++, Will buy again! Excellent in all aspects & highly recommend!! Thank you!

Such a great book! We love Dr. Seuss' learning library. Very educational, and I love how our little ones can tell me all about the book because of the rhyming. Would recommend!

Great kids book. Bought a copy for my nephew and my husband wanted a copy for our house too so had to buy a second!

We like to compare animals now to the ones in the book. The children and I discuss differences and similarities.

Great book. Arrived on time.
